DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 11 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Dressler (US 6,613,412).

With regard to claim 11, Dressler discloses a product comprising: a carrier (30a); a sheet (transparent film 32) attached to the carrier with an adhesive (adhesive 34), the sheet being smaller in at least one dimension, than the carrier (col 11, line 46 – col 12, line 5); wherein the adhesive leaves substantially no tacky residue on the sheet when it is removed from the carrier (col 11, lines 46-59).

Art Unit: 2622

With regard to claim 12, Dressler discloses a product comprising: a carrier (30a); a sheet (transparent film 32) attached to the carrier, the sheet being smaller in at least one dimension, than the carrier (col 11, line 46 – col 12, line 5); wherein the adhesive leaves substantially no tacky residue on the sheet when it is removed from the carrier (col 11, lines 46-59).

3. Claim 20 is rejected under 35 U.S.C. 102(e) as being anticipated by Clark (US 5,428,423).

With regard to claim 20, Clark discloses a product for use with a printer having a paper handling mechanism the product comprising: a sheet having a perforation (40) formed therein, the perforation defining a printable area inside the perforation (See figure 2, photographic image surface 32); and means for preventing printed matter from being applied to the paper handling mechanism of the printer (See figure 2, small margin created by perforation and the selvedge strip) (col 6, lines 15-26).
